Hello

I'm sorry for my bad English :-)

I would like make a bugfix or implement some feature in Kadu project. Please, could you help me with a choice of bugs or features for implement?

In the beginning I want something simpler bug or feature. I am a begginer programmer in Qt - I created one app in Qt (<http://gitorious.org/felfilemanager>) and one app in PyQt (<http://projectkenai.com/projects/dreamy/sources/mercurial/show/>).

I found these things:

<http://www.kadu.im/redmine/issues/2005>

<http://www.kadu.im/redmine/issues/2507>

Thank you very much

Jiří (Jirka) Zamazal
Czech Republic

PS: If you know some developer of Kadu's community who can speak Czech or Slovak, give me his contact, please :-)

Don't be sorry, we are cool ;). Also, we aren't native speakers as well. I think we will not have any problems with communication, we're all Slavs after all :).

And answering your last question, sadly I don't know anyone who can speak Czech or Slovak.

It's really great to see interest in Kadu! We and the whole community will appreciate any help. We'd love to see you working with us on Kadu ;). I think the issues you have found are pretty good for Kadu beginners, and I also made a list of some easy-at-first-glance tasks, you may also pick one or two from them:

<http://www.kadu.im/redmine/issues/953>
<http://www.kadu.im/redmine/issues/1167>
<http://www.kadu.im/redmine/issues/2118>
<http://www.kadu.im/redmine/issues/2472>
<http://www.kadu.im/redmine/issues/2487> - this is though a Gadu-Gadu-only feature so you might not be interested
<http://www.kadu.im/redmine/issues/1775>
<http://www.kadu.im/redmine/issues/2478> - this task is also not interesting at all ;)

And a bit harder one, but might be interesting if you are using Unity:
<http://www.kadu.im/redmine/issues/2367>

Unfortunately most tasks, especially the old ones, are described in Polish. We can translate some of them to English if it will help.

Once you get something done, the preferred way of submitting patches is to make your own clone of Kadu repository on Gitorious and create Merge Requests there.

You may want to also take a look at our mailings lists. They are not very lively, but at least we developers are subscribed and will try to answer any questions there, especially on kadu-devel list.
http://sourceforge.net/mail/?group_id=36658 You can also contact us on IM. I use GTalk on this Google Account. And on IRC, #kadu @ freenode - though we aren't always available there.

And by the way, your apps look pretty good at first glance, I hope you will not have any serious problems with Kadu.

Good luck!

Hello. I think the best way to keep up is to subscribe to our kadu-devel mailing list and just ask questions here.

You can also ask me directly on GTalk: vogel@kadu.im

Thank you very much! :-)

I will try to implement these things:

- <http://www.kadu.im/redmine/issues/953>
- <http://www.kadu.im/redmine/issues/2507>
- <http://www.kadu.im/redmine/issues/2005>

I begin to do it for about 14 days, when I have more time in school :-)

Could you please translate into english this page? <http://www.kadu.im/redmine/issues/1167>

Dziękuję :-)

Jirka

Hello,

I'm sorry, I'm late.

Today I tried to do first thing in the Kadu - Feature #953

<https://gitorious.org/~mazlik/kadu/zamazal-kadu/commit/698375f1a42262297337f802f2649599755a7994>

What do you think? Is it good or bad?

Thank you.

Jirka Zamazal

Hello!

Thanks a lot! I left a comment under your merge request, it is good but has a few small issues normal for new developers.

I added you to the Contributors group in Redmine, so please assign tasks to yourself in future when you start working on them.

Bartosz
