Projekt phpMyAdmin

PHP-based web front-end pro MySQL

The screenshot displays the phpMyAdmin web interface in a browser window. The address bar shows the URL `localhost/phpmyadmin/index.php`. The interface includes a top navigation bar with tabs for `Databases`, `SQL`, `Status`, `Processes`, `Privileges`, `Export`, `Import`, `Variables`, `Charsets`, and `More`. The main content area is divided into several sections:

- General Settings:** Includes a dropdown for "MySQL connection collation" set to `utf8_general_ci`.
- Appearance Settings:** Includes a dropdown for "Language" set to "English", a dropdown for "Theme / Style" set to `pmahomme`, and a dropdown for "Font size" set to `82%`. A "More settings" link is also present.
- MySQL:** Lists server details: `Server: localhost via TCP/IP`, `Server version: 5.1.33-community`, `Protocol version: 10`, `User: root@localhost`, and `MySQL charset: UTF-8 Unicode (utf8)`.
- Web server:** Lists server details: `Apache/2.2.14 (Win32)`, `MySQL client version: mysqlnd 5.0.8-dev - 20102224 - $Revision: 310735 $`, and `PHP extension: mysqli`.
- phpMyAdmin:** Lists version information: `Version information: 3.4.4, latest stable version: 3.4.10.1`, and links for `Documentation`, `Wiki`, `Official Homepage`, `Contribute`, `Get support`, and `List of changes`.

At the bottom of the interface, there are two warning messages:

- A yellow warning box: "A newer version of phpMyAdmin is available and you should consider upgrading. The newest version is 3.4.10.1, released on 2012-02-18."
- A red warning box: "Your configuration file contains settings (root with no password) that correspond to the default MySQL privileged account. Your MySQL server is running with this default, is open to intrusion, and you really should fix this security hole by setting a password for user 'root'."

Soutěž

A screenshot of a web browser displaying the phpMyAdmin contest page. The browser's address bar shows the URL 'www.phpmyadmin.net/home_page/contest.php'. The page has a dark blue header with the phpMyAdmin logo and navigation links: 'About', 'News', 'Security', 'Support', 'Docs', 'Try', 'Contribute', 'Themes', and 'Download'. The main content area is white and features a green heading 'Contest: win books!'. Below this, a paragraph states that Packt Publishing sponsors the contest with six copies of the 'Mastering phpMyAdmin 3.4' book. A section titled 'Rules' contains a bulleted list of contest conditions. Another section, 'Acceptable small feature requests', lists six specific requests. The final section, 'How to submit your patch', provides instructions for submitting a patch, including using a patch tracker and configuring a SourceForge.net profile. The phpMyAdmin logo is visible in the bottom right corner of the page content.

Contest: win books!

Packt Publishing sponsors this programming contest, offering six copies of the [Mastering phpMyAdmin 3.4](#) book (two print copies and four e-books).

Rules

- For each item in the list of acceptable small feature requests below, the first person to submit a correct patch implementing this feature to our patch tracker (refer to "how to submit your patch" below) wins a book
- The patch must be accepted by the phpMyAdmin team
- Winners will get the choice of printed or e-book based on the timestamp of their patch tracker submission
- The winner's name for each feature request will appear on this page
- Members of the phpMyAdmin team are not eligible to the contest
- The contest runs from March 5 to April 15, 2012 at 23:59 UTC
- (Update) Maximum of one prize per person

Acceptable small feature requests

1. [Add option for ignoring foreign keys when dropping tables](#)
2. [Show index information in the data dictionary](#)
3. [Option "Truncate table" before "Insert into"](#)
4. [No correct inserting / editing of large VARCHAR fields](#)
5. [Create with same name AND grant on user_%](#) (winner: Jo Michael, e-book)
6. [Export all privileges](#) (winner: Alex Marin, print copy)

How to submit your patch

- Be familiar with our [developers page](#)
- Prepare your patch against the master branch
- Submit it to our [patch tracker](#) with a title such as "Contest-X", where X is the number from the above features list
- On the tracker, use the "Visibility: private" checkbox
- On your SourceForge.net profile, ensure that you have configured your email address so that we can communicate with you
