

Semestral project OSP

Jan Minařík

my work - LibreOffice

bug 60663 - Adapt hyphenation dialog to HIG

- read Gnome HIG
- check if dialog fails HIG rules
- edit dialog where fails
- send patch

Status: done and pushed to master

my work - LibreOffice

Find hardcoded dialog and do transform to *.ui

Status: failed

Explanation: It is not easy to find some "easy" dialog

my experience

- great communication
- nice to newcomers
- EasyHacks - good way to start
