# OPEN GPS TRACKER

Tomáš Jiřík

Open-Source Programování

(A4M35OSP)

APP'S CAPABILITIES

- Similar to well known MyTracks (by Google)

- Recording your GPS position

- Displaying your actual position and track on a map

- Can use:

  - Google Maps

  - Open Street Maps

- Can be used with offline maps (Mobile Atlas Creator)

- Can export and share your tracks

MY JOB

- Add possibility to send SMS with your current location
- Using default SMS application
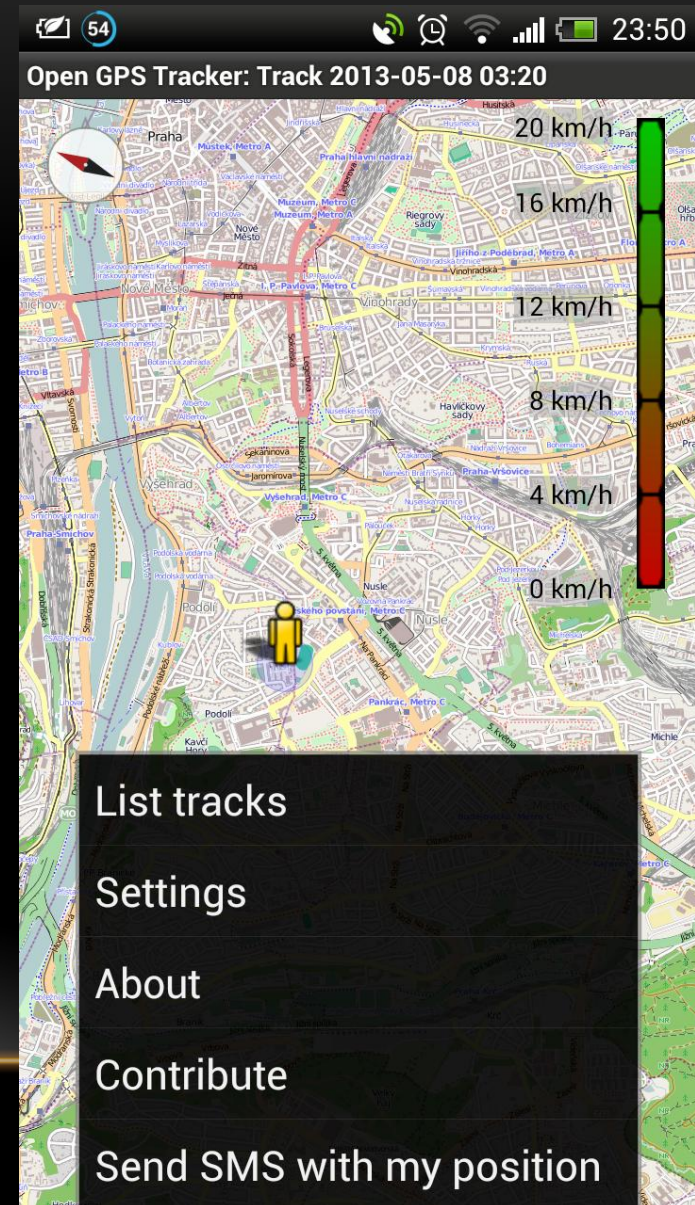

Open GPS Tracker

MY JOB

- Now you can find under More button option – Send SMS with my position

- Redirect to user default SMS application with add text:

My current location is:

Lat: lat (double)

Lon: lon(double)

- User choose recipient in his default SMS application

MY JOB

- Now you can find under More button option – Send SMS with my position

- Redirect to user default SMS application with add text:

My current location is:

Lat: lat (double)

Lon: lon(double)
