v10

- AIM (AOL Instant Messenger)
- Facebook (See instructions)
- Gadu-Gadu
- IAX (Inter-Asterisk Exchange)
- ICQ
- IRC (Internet Relay Chat)
- Jabber
- MSN
- Netsend
- Tlen
- Yahoo
- a další

POPIS PRÁCE

Fix bugu číslo 206 (<http://code.google.com/p/miranda/issues/detail?id=206>)

What steps will reproduce the problem?

1. Choose a directory (or directory structure)
2. Send it via ICQ protocol (not tested in combination with other protocols)
3. Recipient has last Miranda 0.8.5 stable release or ICQ5 client (not tested between two 0.9.0 alpha releases)

What is the expected result?

Directory will be transmitted including the directory structure.

What happens instead?

No directory structure at the recipient. => Files only.
