# Nibbles

- snake-like game
- multiplayer - max 6 players, AI, network
- one of gnome games

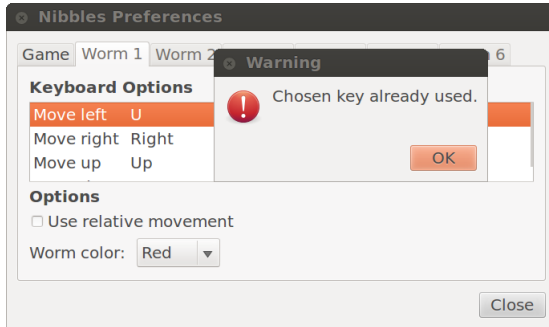

# Issue

- settings enables to set same key for different actions

# Solution

- warning message is displayed when user tries to set already used key

# Summary

- problem was solved
- developers did not respond
- status of bug 694244 is still unconfirmed

The screenshot shows a web browser window displaying a bug report on the GNOME bugzilla website. The URL is [https://bugzilla.gnome.org/show\\_bug.cgi?id=694244](https://bugzilla.gnome.org/show_bug.cgi?id=694244). The page title is "Bug 694244 - A possible error while changing default controls". The report was filed by Aruna Sankaranarayanan on 2013-02-20 at 07:12:01 UTC. The status is UNCONFIRMED. The description details a problem with default controls in Gnome-Nibbles, where pressing a key accidentally changes more than one control. Steps to reproduce are provided: Run Nibbles, go to Settings->Preferences, select Worm1, and click on the "Right" control line.

Please describe the problem:  
Four default controls are necessary in Gnome-Nibbles :  
Left, Right, Up and Down, which are provided for by the four arrow keys by default.

When I try to change the controls, I can press the same key accidentally for more than one control. In the sense that I can have H control both the upward and rightward movement of the worm.

Steps to reproduce:  
Run Nibbles.  
Go to Settings->Preferences  
Select Worm1(Since it's the worm controlled by you)  
Select the control line saying "Right" and click it. Then press any key you

<b>Product:</b>	gnome-nibbles
<b>Component:</b>	general
<b>Version:</b>	git master
<b>Status:</b>	UNCONFIRMED
<b>Priority:</b>	Normal
<b>Severity:</b>	normal
