

“Module gallery”

Nivardo Villanueva

A4M35OSP – Open source

Joomla

- ▶ Is a content management system (CMS)

Vyohda:

Is used all over the world to power Web sites of all shapes and sizes.

- *Online magazines, newspapers & publications
- *E-commerce and online reservations
- *Government applications
- *Small business Web sites
- *Personal or family homepages

- ▶ Looking at the forums in Spanish Joomla about modules gallery.
- ▶ The existing modules not satisfy all requirements, since each user searches according to their business needs

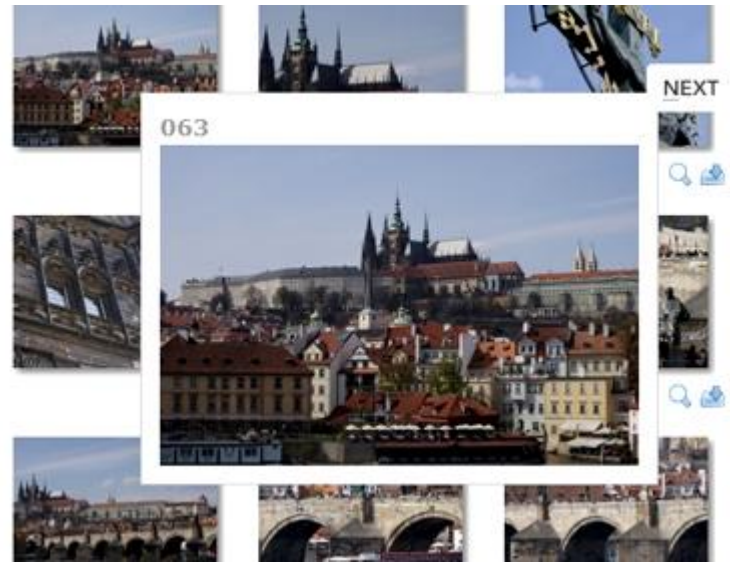

My goal is:

Well now I'd like to develop my own "module gallery" trying to fill some of their expectations or needs and while also fill mine.

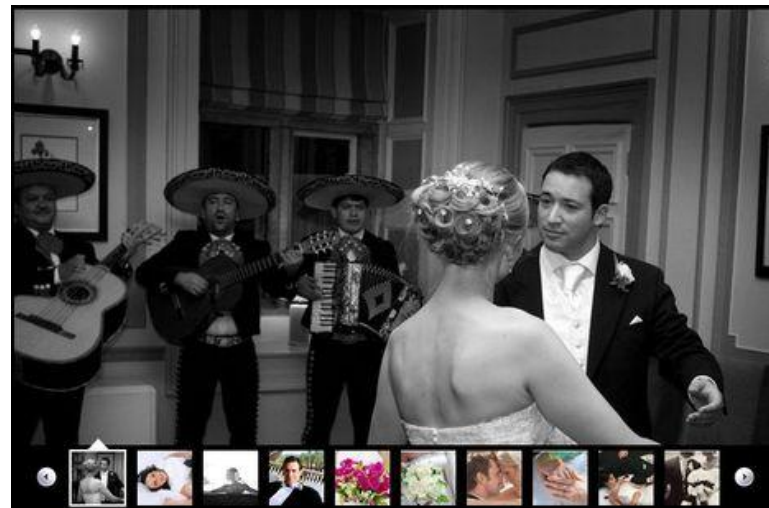

- * Ozio gallery
- * Phoca gallery
- * Ignite gallery
- * Mgm gallery
- * iMage gallery.... Etc.

Ignite

Phoca

iMage

Module

- ▶ Is in its most basic form two files: an XML configuration file and a PHP controller file
