- GNU General Public License
- Free documentation tool for Delphi
- JavaDoc support
- Delphi
- Lokalizovaný do CZ

```
/**
 * Get the value of string
 * @
 * @deprecated
 * @exception GetString() {
 * @param s:string;
 * @return
 * @see
 * @serialData
 * @since ue of string
 * @throws
 * @param ...
```

Co to je ?

- v0.23 Beta
- GUI
- Konfigurace
- cmd
- tag quality

Výsledná dokumentace

The screenshot shows a web browser window titled "MyIE2 - [DelphiCodeToDoc - Project1]". The browser's address bar shows "Index of /uploa | Alex C. Angel | DelphiCode...". The main content area displays the documentation for the "TDOCTemplate" class. At the top, there are navigation links: "Project1", "Content", "Index", "Previous (TDOCStructure)", and "Next (TDOCTemplateList)". The documentation is organized into sections: "Class" (linking to TDOCTemplate), "Class Hierarchy" (linking to TObject), "Related Unit" (linking to Structure), and "Description" (highlighted in yellow, stating "Base class for Classes, members, ... in the final structure"). Below this are sections for "Members", "Fields", "Methods", and "Propertyys". The "Fields" section contains a table with 6 rows, and the "Methods" section contains a table with 6 rows. The "Propertyys" section is partially visible at the bottom.
