

OpenEMR Project

Rosion Versace Dzian

About OpenEMR

- Electronic health records and medical practice management application
- One of the most popular open source electronic medical records in use

My Contribution

- Prettify the “Acknowledgments, Licensing and Certification” page and incorporate it to the rest of the pages of the application
- That means
 - Make this page look good
 - Add some CSS style and some JavaScript
 - Incorporate it to the rest of the project

My Contribution

- What I did:
 - Study the project documentation for new developers
 - Study the project structure and how to work with the project
 - Propose a new design
 - Create a new page respecting the project structure
 - Add CSS and JavaScript for this page
 - Tested my changes
 - Committed my work to my branch

<https://github.com/rozion/openemr-1/tree/branch1>

Results

- My Contribution ticket on Sourceforge.net:
<http://sourceforge.net/p/openemr/feature-requests/123/>

The screenshot shows the SourceForge website interface. At the top, there is a navigation bar with the SourceForge logo, a search box, and links for Browse, Enterprise, Blog, Help, and Jobs. Below this is a secondary navigation bar with links for SOLUTION CENTERS, Smarter Commerce, Go Parallel, HTML5, Smarter IT, Resources, and Newsletters. The main content area displays the OpenEMR project page, including the project logo, the name 'OpenEMR', and the text 'Brought to you by: bradymiller, sunsetsystems'. A horizontal menu contains links for Summary, Files, Reviews, Support, Wiki, Piwik, Tickets (selected), News, Discussion, Donate, Code, Cvs, and Mailing Lists. On the left side, there is a search box for 'Search Feature Reque', a 'View Stats' button, and a 'Group' section with two buttons: 'Next_Release' with a count of 40 and 'None' with a count of 12. The main ticket area shows the title '#123 Styling the "Acknowledgments, Licensing and Certification" page' with a feed icon. Below the title is a table of metadata: Milestone: None, Status: closed, Owner: nobody, Labels: None, Priority: 5, Updated: 2014-04-11, Created: 2014-04-09, Creator: Rosion, Private: No. The ticket description reads: 'The aim is prettify the "Acknowledgments, Licensing and Certification" page in other to make it look nicer.' At the bottom, there is a 'Discussion' section.

I've made all the changes you mention and committed it again here:
<https://github.com/rozion/openemr-1/tree/branch1>
Can you please check it again?

Looks good. I just **committed this to the official codebase** (it's on sourceforge repo now and will get mirrored over to github repo in 20 minutes). Also added you to the Contributions page on the wiki:

My New Contribution on the Project

- New project description:
 - Create a function that will allow importing of different code types (like ICD9, ICD1)
- Working with 3 other contributors
- Still working on the project:
 - <https://sourceforge.net/p/openemr/discussion/202506/thread/c6899c17/#32f4>

Collaboration with the Project Admin

- Very good communication
- Via email

Hi Rosion,

OpenEMR has a very flexible code typing feature (ICD9/ICD10/CPT2/SNOMED/etc.). Check out this v http://www.open-emr.org/wiki/index.php/Code_Types#Configure.2FAdd_Code_Types
(the real magic happens when use the External feature, which allows use of custom sql tables rather t

After setting that up, then need to figure out a way to get the codes into new separate sql tables. And tl
codes(ICD9,ICD10,SNOMED) from their original packages into the appropriate sql tables). Recomme

Wow,

The page looks awesome (ie. professional and clean).

Do you need to include both the `bootstrap.min.css` and `css/bootstrap.css` files (I think you only need to include the min one)? Also, place the bootstrap css library file in the `library/css` directory and label the file with the version, such as:
`bootstrap-3-1-1.min.css`
(I am assuming this is version 3.1.1; place whatever bootstrap version you are including)

Collaboration with the Project Admin

- + Good communication
- + Many communication tools
- - Long time delay do get answer
- - Just one project admin

Any Questions?
