

# OSP - presentation

David Tomáš - jEdit

- **New feature**
- Adding a support for advanced mouse buttons (B4 and B5) as Navigator->Back and Navigator->Next

**My task**

- Navigator is a jEdit plugin
  - First step was to download navigator source codes
  - Then create and navigator instance and initialize it
  - Last step is to connect it to MouseListener

**Solution**

- Task is not complete yet
- I must solve a little bug with MouseListener

**Task Result**

- I got response from a developer
- He sent me some information about getting started with developing in jEdit
- He agreed with my feature

**Communication**

- Questions?

**Thanks for your attention!**
