About Cesium

- Cesium is a JavaScript library for creating 3D globes and 2D maps in a web browser without a plugin

- It uses WebGL for hardware-accelerated graphics, and is cross-platform

- Open-source alternative to Google Earth

Cesium development

- Cesium was founded in 2011

- Hosted on Github: 17 000 commits, 79 contributors

- Last month: 100 commits

- 6 major developers (at least 1000 commits), about 4 co-op developers

My Assignment

- https://github.com/AnalyticalGraphicsInc/cesium/issues/3688/
