Subject: Request for participation

Content:

Hello everybody,

first of all let me introduce myself. My name is Thomas Tunys and I am actually pursuing a
Masters degree in Computer Science on Faculty of Electrical Engineering,
Czech Technical University in Prague (Department of Computer Science and Engineering).

Among the subjects I have in the current semester there is one called "Open Source
Programming" and as well as other parts, there is a compulsory part - to participate
on an open source project of our choice. I think of yours 'muCommander' as far the best open
source file manager I have seen and I would love to participate on it.

What I want you to help me with
===============================
- try to find me a wanted feature not yet implemented in the muCommander, that you find
important or interesting (I think of one or two improvements that you may find interesting),
- let me know how do you manage the code of the project (how it goes with commits and other
things). I have managed to import the project from the SVN repository into the Eclipse IDE.

Important dates (connected to my subject)
===
3rd of March 2011 - The presentation of setting to lecturer (mission), which should contain:
 * assignment(s) agreed by comunity.
 * the implementation.
 * the verification.
 * acceptance by project member(s)

My assignments have to be completed till 29.4.2011.

Brief info about me
===================
Bachelor's degree in Software Engineering (2010, link to my thesis:
"https://dip.felk.cvut.cz/browse/pdfcache/tunystom_2010bach.pdf").
I find myself skilled in c, c++, c#, and java and I am particularly skilled in work with
Java Text and Table components.

So if you could assign me appropriately complex task(s) (or let me choose on my own from the
bug/issue tracking system) which could help the community I would be most gratefull.
Please only keep in mind I have quite strict deadlines.

I am looking to hearing from you soon.

Best regards,

Thomas "Monkeybrain" Tunys
