# LibreOffice.org Bug 62767

OSP - Results - Miroslav Voda

Bug 62767 - EDITING: mouse over a formula - box

Main issue - Find the bug

Big problem - Why ?

- Large and old project => tons of files with messy code without modern software engineering principles
- No comments and if any then in GERMAN ?!

Debugging steps

1. Output (string) printing - no success
2. Recompilation with debug flags
3. Debugging with GDB -> low clarity -> GUI needed
4. Debugging with DDD -> old tool, crashed every time
5. Qt Creator - right choice but GDB configuration needed
6. Set and inspect breakpoints
7. Solve issue
8. Create patch

Communication with community

Many bugs in projects + low priority of this bug = long response time

Result

Thanks for attention
