# About Grails

powerful web framework for JVM written in groovy

lots of useful plugins

[github.com/grails/grails-core](https://github.com/grails/grails-core) - 17k commits, 113 releases, 180 contributors

communication via mailing list or github bugtracker

# My contribution

add the possibility of extra data attribute to g:select tag

```
<g:select name="user.age" from="{18..65}"/>
```

```
<select>
```

```
  <option value="18">18</option>
```

```
  ....
```

```
  <option value="65">65</option>
```

```
</select>
```

```
<select>
```

```
  <option value="18" data-x="x">18</option>
```

```
  ...
```

```
  <option value="65" data-x="y">65</option>
```

```
</select>
```
