PhpMyAdmin

- Tool written in PHP

- Administrates MySQL over WWW

- Hosted on GitHub

My goal

- Feature request #1412 - "Creating a view from an empty set of results"

- PhpMyAdmin does not allow to create a view from a query which has returned an empty set of results

Query results operations

🖨 Print view   🖨 Print view (with full texts)   📑 Export   📊 Display chart   📷 Create view

Create view ⊘ ✖

OR REPLACE	☐
ALGORITHM	UNDEFINED ▼
VIEW name	
Column names	

AS

```
1  select * from users left join options on
2  users.id = options.users_id
```

WITH

☐
CASCADED CHECK OPTION

☐
LOCAL CHECK OPTION

Go   Close

Tools

- GitHub git repository

- Sourceforge.net issue tracker

- PHP+MySQL (server, programming tools)

That's it, folks!
Thank you
