Hey Frantisek --

Thanks for the note, and for your interest in translating the plugin to Czech. The rest of our Czech users will certainly appreciate it :)

You are correct that it'd be generally the same as for other plugins. With a tool like POEdit, just generate a new translation from the .pot file, make your changes and save. Doing so should create a .po/.mo file; if you send me both of those we'll work them into the next release for The Events Calendar.

After that, if you've got any interest in translating PRO as well, let me know. Happy to comp you a free license in exchange for your translation work on the PRO front.

Cheers,

- R

What's Up

I have a WordPress project

Comments or Questions

Hello,

I'd like to translate your WP plugin The events calendar into Czech language. Hope you don't mind.
I haven't found any information about this process, but I suppose it will be the same like with other WP plugins translation.
