Miranda IM

A4M35OSP
Pavel Filip

Miranda IM is…

- Instant messaging client for Windows.
- No-installation, light on resources.
- Plug-in based, customisable.

- Multi-protocol!

  (AIM, Facebook, G-G, IAX, ICQ, IRC, Jabber, MSN, Netsend, Tlen, Yahoo, …)

- And its open-source (GNU GPL)

Miranda project

- Miranda homepage
- Project manager, ressource manager, lead developer
- Protocol developers
- Community of contributing volunteers

Miranda source code

- Programmed in C++
- Uses code.google.com:

Issue tracker, source code management, development site, development mailing list.

My contribution?

- Choosing an achievable goal
- Warning user about wrong system date.
- Finding the right solution

- Future involvement, growing goals?
