My contribution

- ▶ Fix issue with exchange rate in transfer transaction.
- ▶ If accounts is filled with autocomplete then exchange rate will not load properly(1 instead of actual value).

The screenshot shows a mobile application interface for a transfer transaction. At the top, a blue header displays the amount '10.00 €' and a circular icon with a double-headed arrow. Below the header, a red error message reads 'Exchange rate was not loaded properly', with a small red box containing the number '1' to its right. The amount '10.00 CZK' is shown in the bottom right of the header area. The main content area is white and contains several sections: a date and time section showing '28 February' and '20:18'; an account selection section with a red box around 'Fio EUR' and 'Fio CZK', and the word 'Autocompleted' in red; a 'Tags' section; and a 'Note' section. At the bottom, there is a 'Confirmed' status with a green checkmark icon, and two buttons: 'Cancel' and 'Save'.

My contribution

- ▶ Changeset: 1 file, 4 lines of code
- ▶ Commit in my fork of project - <https://github.com/antopor/financius-public/commit/186cfcff59ad2b5e3b1b9758ae45730b74c86cc7>
- ▶ Pull request to the original repository - <https://github.com/mvarnagiris/financius-public/pull/363>
- ▶ Pull request has not been either accepted nor declined
- ▶ My discussion with maintainer was in the form of comments to the pull request
