SumatraPDF

- Simple open source PDF reader for Windows
- First release v0.1: 2006-06-01
- Last release v3.0: 2014-10-18
- Homepage: <http://www.sumatrapdfreader.org/>

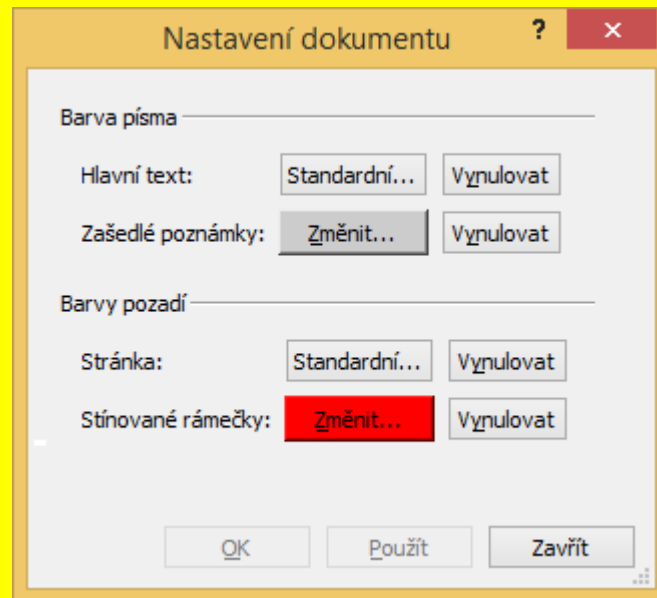

Project Organization

- There is a bug report, issue tracker, forum, translation guide, manual and wiki
- For developers:
 - GitHub repository (<https://github.com/sumatrapdfreader/sumatrapdf>)
 - Language C++
 - Visual Studio 2013 Update 4 is recommended for development
 - Standard GitHub model is used: fork -> pull -> they will review the code, provide the feedback and merge it when it is ready

My work

- Document colors can be changed only by using hexadecimal numbers in setting file
- It is not user-friendly solution
- I would like to add a panel with possibility of colors modification

```
MainWindowBackground = #80fff200
EscToExit = false
ReuseInstance = false
UseSysColors = false

FixedPageUI [
  TextColor = #000000
  BackgroundColor = #dddddd
  SelectionColor = #f5fc0c
  WindowMargin = 2 4 2 4
  PageSpacing = 4 4
]

EbookUI [
  FontName = Georgia
  FontSize = 12.5
  TextColor = #5f4b32
  BackgroundColor = #fbf0d9
  UseFixedPageUI = false
]

ComicBookUI [
  WindowMargin = 0 0 0 0
```

SumatraPDF

Thank You
