ABOUT BOOTSTRAP

- Bootstrap is the HTML, CSS, and JS framework for developing responsive, mobile first projects on the web.
- Bootstrap is the most-starred project on [GitHub](#), with over 93K stars and more than 40K forks.
- Aims to ease the development of [dynamic websites](#) and [web applications](#).
- Bootstrap ships with vanilla CSS, but its source code utilizes the two most popular CSS preprocessors, [Less](#) and [Sass](#).

HOW TO CONTRIBUTE

- Fork the project & clone
- Create a new topic branch to contain feature, change, or fix
- Commit and locally merge
- Push topic branch up to your fork
- Open a Pull Request with a clear title and description

PULL REQUEST BOTS

- [@twbs-rorschach](#) is a Bootstrap bot that hangs out in our GitHub issue tracker and automatically checks all pull requests for a few simple common mistakes.
- [@twbs-savage](#) is a Bootstrap bot that automatically runs cross-browser tests (via [Sauce](#) and Travis CI) on JavaScript pull requests.
- Savage will leave a comment on pull requests stating whether cross-browser JS tests passed or failed, with a link to the full Travis build details.

MY CONTRIBUTIONS

- Update jQuery to v1.12.3 - #19893
- Fix: border removal affecting child tables (CSS) - #19902
 - This rule is supposed to remove the top border of the first row of a table in a panel (as its direct child).
- Collapse plugin not finding trigger when targeting a class (JS) - #19779
 - When a collapse panel is targeting either a class or a comma separated list of ids, the trigger's class and aria attributes are not updated.

MY CONTRIBUTION - COLLAPSE PLUGIN

```
2 ■ ■ ■ ■ ■ js/collapse.js View 
```

APPROVAL PROCESS

twbs-savage commented Bootstrap member 

Tests passed. Automated cross-browser testing via Sauce Labs and Travis CI shows that the JavaScript changes in this pull request are: **CONFIRMED**

(Please note that this is a fully automated comment.)

 **Some checks haven't completed yet** Hide all checks

1 pending and 2 successful checks

-  ● **hound** — Hound is busy reviewing changes...
-  ✓ **continuous-integration/savage** — CONFIRMED: Savage cross-browser JS ...
-  ✓ **continuous-integration/travis-ci/pr** — The Travis CI build passed Details
-  ✓ **This branch has no conflicts with the base branch**
Only those with [write access](#) to this repository can merge pull requests.

EVALUATION OF RESULTS

- Two of the three issues went through a auto bot tests.
- Last one (JS) is still waiting for approval, because of some conflicts in my code, I do not suppose it will approve.
- All these contributions are on the queue list of team core administrators for the final pull request.

COLLABORATING WITH THE COMMUNITY

- Bootstrap community is very friendly and helpful .
 - As you hold the prescribed rules regarding contributions to the project.
- I loved to automatically checks all pulls for a few simple common mistakes.
- It'll save you an embarrassing moment because of syntax errors.
- Certainly I plan to contribute to the project in the future.

The image features a dark blue background with white, stylized circuit board traces in the corners. These traces consist of straight lines of varying lengths and angles, ending in small white circles, resembling electronic components or nodes on a circuit. The traces are located in the top-left, top-right, bottom-left, and bottom-right corners, framing the central text.
