F R A M E W O R K

Ondřej Šatera, saterond@fel.cvut.cz

Summer semester 2012/2013

Objectives

- Nette is PHP framework
- MVP architecture
- alter rendering of the forms
- ability to add some description to a button

Successes

- change of the main form renderer
- single PHP class in the framework core
- maintained consistency with other form elements

Example - code

```
class HomepagePresenter extends BasePresenter
{
    public function createComponentForm($name)
    {
        $form = new \Nette\Application\UI\Form($this, $name);

        $form->addText("text", "Normální textové pole")
            ->setOption("description", "Nápověda k poli");

        $form->addText("text2", "Pole bez popisu");

        $form->addSubmit("send", "Odeslat")
            ->setOption("description", "Nápověda k tlačítku");

        return $form;
    }
}
```

Example - result

Normální textové pole

Nápověda k poli

Pole bez popisu

Odeslat

Nápověda k tlačítku

Work with the community

- quick response on the official forum
- rich discussion
- I'd love to continue with the contribution
- no negatives

Thank you for your attention
