Jakub Pýcha

pychaja1@fel.cvut.cz

A4M35OSP

My contribution

- My work is to implement feature request [WFLY-4382]
 - **Functionality to allow symbolic links**
\$wildflyHome/welcome-content/symlink →
\$wildflyHome/web

localhost:8080/symlink/index.html

My contribution - result

- 1. Create fork
- 2. Maven build
- 3. Implement feature request
- 4. Tests and build
- 5. Create pull request to main project

My contribution - problems

 ctomc added a note 3 days ago

this should be enabled by configuration option not by default.
similarly as it was done in <https://issues.jboss.org/browse/WFLY-4254> for web applications

 jakubpycha added a note 3 days ago

I agree and i'll fix it.

 ctomc commented 2 days ago

I've send bit more complete PR to address also this here: [#7440](#)

Experience

- Fast community communication
- Good project build
- Work was done twice ...
- Feature request is in core project and issue is closed.

Thank you for your
attention
