NETTE FRAMEWORK – ABOUT PROJECT

- Open source object-oriented PHP Framework (MVC)
 - + additional tools like Nette Tester, Tracy,...
- Created by David Grudl, 2004
- Overview
 - Great security
 - Performance
 - Debugging tools
 - Simple architecture
 - Active Czech community

NETTE FRAMEWORK – ABOUT PROJECT

- Used by: Internet Info (lupa.cz, root.cz,..), Mladá Fronta, Socialbakers, Slevomat, ČSFD.cz,...
- Sources in GIT (GitHub)
 - <https://github.com/nette/nette/>
- Ohloh
 - 50k lines of code
 - <https://www.ohloh.net/p/nette>

Parse Error

syntax error, unexpected 'namespace' (T_NAMESPACE)

WHAT IS NEON?

- NEON - Nette Object Notation
 - Configuration “language”
 - Similar to YAML

```
# comment

name: Homer

address:
  street: 742 Evergreen Terrace
  city: Springfield
  country: USA

phones: { home: 555-6528, work: 555-7334 }
```

- <http://ne-on.org/>

```
array(5) {
  name => "Homer" (5)
  address => array(3) {
    street => "742 Evergreen Terrace" (21)
    city => "Springfield" (11)
    country => "USA" (3)
  }
  phones => array(2) {
    home => "555-6528" (8)
    work => "555-7334" (8)
  }
}
```

MY CONTRIBUTION

< config files can't have property named "on" #809

New issue

 Open sharkodlak opened this issue a year ago - 12 comments

sharkodlak commented a year ago

Property named "on" is wrongly replaced by 1. Replaces shell be applied only on values.

config.neon:

parameters:

server:

cache:

on: true

dir: blahblah

PHP cache representation: (Nette\Environment::getConfig("server")->cache)

```
Nette\ArrayHash(2) {
```

```
1 => TRUE
```

```
dir => "blahblah" (8)
```

```
}
```

MY CONTRIBUTION

← NEON parser: fixed replacing special keywords for keys&test [Closes #809] #1451

Open vjirovsky wants to merge 1 commit into nette:master from vjirovsky:nette-neon

Conversation 13 Commits 1 Files Changed 2

+9 -4

vjirovsky commented 2 days ago

NEON parser will not convert special keywords as true, false, on,... to special values in keys or array. In values function special keywords replacement is preserved.

```
parameters:
true: true
```

will be parsed as:

```
parameters{
  "true"=> TRUE
}
```

instead of wrong:

```
parameters{
  1 => TRUE
}
```

■ Pull request <https://github.com/nette/nette/pull/1451>

RESULT

- 14 comments about “*missing space before bracket*” etc.

A screenshot of a GitHub pull request interface. On the left, there is a small profile picture of a man with a beard wearing a black t-shirt. To the right of the profile picture is a comment box with a light gray background. The comment text reads "dg commented 2 months ago" and is followed by a button labeled "Owner". Below the comment box, the text "Merged" is displayed next to a blue link containing the commit hash "d1862cf". Below the merged status, there is a red circular icon with a white 'X' inside, followed by the text "dg closed this 2 months ago". A vertical line is positioned to the left of the comment and status elements, and a horizontal line is positioned below them.

IN CONCLUSION

Questions?

Thanks for your attention!
