

Firefox for Android

Jiří Rychlovský
OSP – LS 2016

Project description

- A part of a project organized by Mozilla Foundation
- Non-profit web browser
- Smartphones and tablets with OS Android

My issue

- Bug 1252960 -Rename UrlMetadata* table to UrlImageData*
- The UrlAnnotations table is more like the "Urllmagedata" table – let's rename the table for the data that's in it (url -> thumbnail metadata). For simplicity, let's change the names in code (e.g. class name) and not the actual table name.

Progress description

- Startup setup of development kits,... – Mozilla's script
 - NOT WORKING
 - Installed manually
- Created patch
 - Messed up imports by Android studio
 - Complicated work with Mercurial repository
 - Bad alphabetical order in some file list
 - AS Build vs. Mach build
- Waiting for a review
- Approved by mentor
 - Flag: chekin-needed for another reviewers

Progress description

- Too slow review
 - Base changed – rebase needed
- Tried to rebase
- Mach build failed
- Out of patience

Evaluation

- Assignment uncompleted
- Complicated mercurial repository
- Big live project – code changes 24/7
- Complicated start

Cooperation

- Friendly helping mentor
- Slow reaction – rebase needed
- A LOT of tutorials – in many cases not working

The slide features a light green-to-white gradient background. It is framed by thick, curved borders in yellow and black. The top-left and bottom-right corners are black, while the top-right and bottom-left corners are white. A yellow border runs along the inner edge of the black corners.

Thank you for your attention
