Bug 33831

- MediaWiki plugin
- Export document to wiki article
- Directly upload article to wiki
- Pictures are not exported - only soft-linked

The Document Foundation

- Proactive community
- Response within 24 hours
- Vast documentation
- Tutorials for basics

LibreOffice

- Vast project
- Multi-language
- Uses lot of libraries
- Compilation time
- Proprietary extension handling
- Tons of configuration in xml files
- Developer packages for main distributions

My bug

- Old extension from OpenOffice
- Documentation blind spot
- XLS transformation
- Linked pictures accessed thru context
- Proprietary extension handling
- I'm not done yet

Thank you for your attention.
