GnuCash for Android

- Android app for expense tracking
- Companion to desktop GnuCash
- QIF/OFX export to desktop
- 64% Java / 36 % XML
- Apache license, v 2.0

My contribution

- Add a new feature to set 'Default transfer account' to all sub-accounts in the account tree

Implementation

Intended solution

- Add check-box to account editing dialogue
- Set default transfer account for all sub-accounts
- Create translatable string resource

Accepted solution

- Dynamically lookup possible transfer accounts during transaction creation

Experience

- Friendly environment
- When contributing on GitHub always create new branch!
