Is your Update History exposed through the MAL API?

Nope. Taiga keeps its own history. MAL's API is limited and wacky in general, not just in this case.

when can we expect this in a release?

I'm not planning another v1.2.x release at the moment, and v1.3 needs a lot of work. But I'll update the [latest build](#) after committing this change.

Děkuji za pozornost
