About Play Framework

- Web application framework

- https://www.playframework.com/

- Aim: to optimize developer productivity
  - Convention over configuration
  - Display of errors in the browser

- Open-source

About Play Framework

- Model-view-controller architecture

- Applications are stateless

- Static controller methods

- ORM tool Ebean

- Written in Java, Scala

- Built in testing tools - tests run in the browser

History

- 2007 May - created by Guillaume Bort
- 2009 October - Play 1.0
  - On Launchpad
- 2010 November - Play 1.1
  - On Github
- March 2012 - Play 2.0

Organization

- 18 main developers
- 400 contributors
- Issues tracking: Github
- Communication: Mailing list

My contribution

- Solve 1 or more of simple issues:
  - Small inconsistencies at Java Results API #5872

    https://github.com/playframework/playframework/issues/5872

    StatusHeader.sendFile, sendResource : inline=true as default

    StatusHeader.sendPath: inline=false as default

  - Improve field constructor documentation #5172

    https://github.com/playframework/playframework/issues/5172

    The custom field constructor documentation neglects to say where to put the field constructor template

Thank you for your attention.
