

Sharepoint 2007 features

- Open Source programování
- Jan Salajka

Sharepoint 2007 featurest

- This is a project for SharePoint 2007 Features. Features add new functionality to a SharePoint 2007 farm, site collection, or site. This project will create Features to address deficiencies in SharePoint 2007 or add new capabilities. You should understand a little about Features before trying these out. The packages here use batch files or WSP files to install the Features. After installation, be sure to activate the Features to see them in SharePoint.

My Work

- **Log Viewer Feature gets an error with empty log files.**

- **Description**

The Log viewer feature get an "Object reference not set to an instance of an object." trying to open an empty log file.

Fix Bug

- LogView
 - Simple aspx web application for sharepoint administration
 - Bug – not checked situation with empty log file
 - Fix – check empty log file before sending to dataview and display user friendly message
- Very simple fix
- Very simple „project“

Fixed bug

Unified Logging Service (ULS) Logs

This page allows you to browse the Unified Logging Service logs

Available log files
These are the available log files that you can view.

Select a log file to view
SP-DEVELOP-20100428-0952.log

Log Filtering
Select the keywords to use when filtering the logs

This category...
Topology

AND this event severity...
[]

OR this trace severity
[]

Show the log
Press the button to view the selected log.
Note: If the log file is large, it can take some time to process and display.

Go

Timestamp	Process	TID	Area	Category	EventID	Level	Message	Correlation
There are no data to show

Versioning system – source control

- CodePlex client
 - Non “standard” source control
 - Client for download and upload (checkin, checkout)
 - Diff / merge tool
 - Functionality for simple making patch

- In my project developers don't use this system

Communication with Scot Hillier

- I sent short message throw web form
 - Scot answered me
 - Several email about my request (accept my simple patch)
 - some days nothing happened
 - I upload patch throw web form
 - I send urgency
- Scot published my patch in project on CodePlex
