# c:geo

Adam Lysák
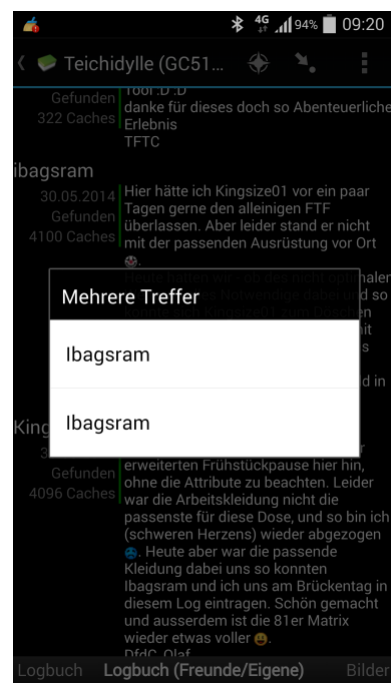

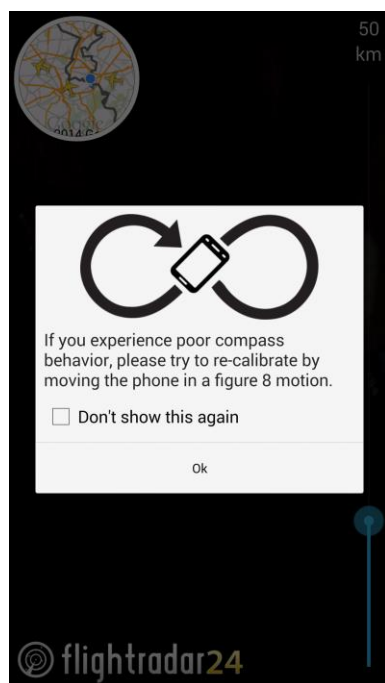

c:geo

- Geocaching client for Android
- Support multiple services (geocaching.com, opencaching.com, …)
- http://www.cgeo.org

My planned work

- Implement compass recalibration notice
- Implement showing more information if multiple contacts found

Result of my work

Summary

- Entire funcionality of my planned work implemented
- Waiting for feedback from authors about my solution

Thank you for your attention
