Firefox for Android

Jiří Rychlovský
OSP – LS 2016

Project description

- A part of a project organized by Mozilla Foundation

- Non-profit web browser

- Smartphones and tablets with OS Android

- Code name „Fennec" for the mobile version of Firefox

- First release: January 28,2010

Technical information

- Uses a lot of languages – my issue is in Java code

- Requirements – Android 2.3 or Android 4.0 or later
  - About 50MB storage space
  - At least 384MB RAM

- Mercurial repository

Organisation

- Bugs tracking system: bugzilla.mozzila.org
- Bugs for newbies:
  http://www.joshmatthews.net/bugsahoy/

- Mentors a reviewers for new contributors

- Communication: Bugzilla, IRC, mailing systém

- Bug -> Patch -> Assignee -> Review ->
  Mentor's commit

My issue

- Bug 1252960 -Rename UrlMetadata* table to UrlImageData*

- The UrlAnnotations table is more like the "UrlImagedata" table – let's rename the table for the data that's in it (url -> thumbnail metadata). For simplicity, let's change the names in code (e.g. class name) and not the actual table name.

Progress so far

- https://bugzilla.mozilla.org/show_bug.cgi?id=1252960

- Got reaction from a mentor with some hints

- Created a patch, commited it and attached it to bugzilla

- Waiting for code review by a mentor

Thank you for your attention
