

open source CRM

Filip Šamánek

# About Zurmo

- ▣ Open source CRM (Customer Relationship Management)
- ▣ Web application
  - PHP, MySQL, JavaScript
- ▣ Application use:
  - PHP framework Yii
  - Database layer RedBeanPHP
  - JavaScript framework jQuery

# My contribution

- ▣ <https://bitbucket.org/zurmo/zurmo/issue/314/firstname-and-lastname-accepts-spaces>
  - When user create contact and first name or other attribute start with space Zurmo don't trim this value. Then there is problem with sorting and search because attribute should start with space
  - I add trim to function purifyHtml which clear input value from html character
  - My pull request : <https://bitbucket.org/zurmo/zurmo/pull-request/932/remove-spaces-from-attributes/diff>

# Summary

- ▣ My contribution
  - I create one pull request with fix bug. Pull request now waiting for accept.
- ▣ What I learned
  - How to join to open source project and how to collaborate on Bitbucket
  - Improve my skills with Mercurial (similarly as git) and Zurmo
