

TaskCluster Mozilla

TaskCluster indexing service

JOSEF VESELÝ
veseljo5@fel.cvut.cz

TaskCluster

- ▶ Platform that Mozilla has developed for running tasks.
- ▶ **The task index** provides a service that indexes successfully completed tasks.

Development

- ▶ Started on 8/31/2014
- ▶ Code hosted on Github 
- ▶ Programming language: JavaScript
- ▶ 4 developers

Bug Description

- ▶ Default index entry expiration to `task.expires` (when indexed from route)
- ▶ [good first bug] :-)

My Solution

```
var expires = new Date();  
expires.setDate(  
    expires.getDate() + 365);
```

```
var expires;  
if (task.expires) {  
    expires = new Date(task.expires);  
} else {  
    expires = new Date(task.created);  
    expires.setDate(expires.getDate() + 365);  
}
```
